

THE REVOLUTION

The world revolution in boxing is here! The AIBA Pro Boxing (APB) brings to the world the pinnacle of pro boxing, with unparalleled transparency in professional boxing. Managed by the International Boxing Association (AIBA), APB showcases 120 of the world's top-ranked boxers, chosen out of the millions of AIBA boxers from all four corners of the world, competing in 10 weight classes.

APB boxers square-off in 8 x 3 minute rounds and compete not only for the title of APB Champion, but also for a chance to qualify automatically for a spot in the Olympic Games.

APB is the very pinnacle of pro boxing, the dawn of a new era.

THE BIRTH OF APB

AIBA is the sole worldwide governing body for boxing. It brings together 196 nations on five continents to promote the sport of boxing. Its mission is to develop and govern boxing in all of its forms, from grassroots bouts through to elite competitions such as World Championships and Olympic Games – and then on to semi-pro and pro boxing.

The AIBA President, Dr Ching Kuo Wu, on his election in 2006, recognized that the future of the sport of boxing stood at a crossroads. Dr Wu set out to create a new, secure and revolutionary pathway for amateur boxers to move up into a professional career. To do this, Dr Wu created the AIBA Pro Boxing.

APB is 'The Revolution' – giving the world's very best boxers a stable, transparent professional career and opportunities to earn significant purses. Each APB boxer is guaranteed four fights a year based on a completely transparent ranking system.

Best of all, for the first time, APB offers boxers the opportunity to compete professionally while still remaining eligible for the Olympic Games – indeed APB is one of the qualifying tournaments, fully supported and endorsed by the International Olympic Committee.

History was made when APB launched in September 2014, with more than 80 participating boxers meeting in Almaty, Kazakhstan for a Draw Ceremony to kick-off the first-ever APB Cycle.

OLYMPIC QUOTAS

APB is the only way for professional boxers to qualify for the Olympic Games. In 2015, 20 boxers (two per weight class) will earn a coveted spot to participate in the Rio 2016 Olympic Games through APB. Ten of these boxers will be the current Champions from the Inaugural APB Cycle and the remaining ten boxers will be their Challengers in the Title Bouts of the Second APB Cycle.

Dawn of a New Era: FIRST CHAMPIONS

The competition to establish the very first APB Champions was a truly global showcase of pro boxing, with bouts taking place in Azerbaijan, Bulgaria, China, Italy, Kazakhstan and Russia. The world's best boxers hailed from five continents and 35 countries, squaring off in front of passionate crowds in iconic cities such as Rome, Paris, Istanbul and Foshan.

APB featured Olympic medalists, AIBA World Champions, World Series of Boxing Title Holders, undefeated professional boxers, savvy veterans and rookie sensations all competing against each another.

Crowning of Champions: APB INAUGURAL TITLE BOUTS

In January and February 2015, watched by boxing media, fans and fellow fighters all over the world, the Inaugural Title Matches crowned the first APB Champions across 10 weight classes. These Champions, the best in the world in their class, will defend their titles later this year and so automatically qualify for the Rio 2016 Olympic Games.

"The future is finally here for boxing and it is glorious," says the AIBA President, Dr Ching Kuo Wu. "This is only the beginning and it is exhilarating to see APB being so successful immediately."

Each Title Bout was full of drama, tension, world class athleticism and non-stop excitement, with fans in awe of the skills on display. The boxers represented themselves and their countries with passion and courage.

Title Match: **LIGHT FLYWEIGHT (49KG)**

Bin Lv from China started his APB career by defeating Birzham Zhakipov from Kazakhstan in a close match. In Week 2, Lv earned his second win against his compatriot and future runner-up, Zhonglin Wu, a contest which was held in a highly charged atmosphere in Hong Kong.
