

Anti-Doping Education Program for the period of Tokyo 2020 Cycle

In line with AIBA Development strategy, to affix Anti-Doping and integrity modules to major international tournament in the AIBA calendar, AIBA strives to organize Anti-Doping seminars with all team delegations invited to take part in as well as WADA outreach program to engage with the athletes and their entourage. In general, Anti-Doping education has achieved greater successes as of Rio Olympic Games 2016. Anti-Doping module will become mandatory as coaches and medical personnel pass through AIBA Stars Program certification by the end of 2018. All coaches coaching in AIBA competitions are required to obtain WADA Coachtrue e-learning certificate. Similarly, all medical personnel are required to go through WADA SPORT PHYSICIAN'S TOOL KIT.

Step 1: All AIBA instructors will play a WADA ANTI-DOPING E-LEARNING (ADEL) video in the theory session of the course and instruct all attendees that it is required to obtain the corresponding Anti-Doping certificate at <https://adel.wada-ama.org> to pass the certification.

Step 2: All coaches and medical personnel will need to show proof of them passing their corresponding e-learning certificates to obtain AIBA certifications.

To date, 5 Anti-Doping education sessions have been conducted, namely 2016 World Youth Championships Saint Petersburg, 2017 ASBC Continental Championships Seminar, Year of Africa Anti-Doping Outreach in Hub Togo, 2017 Hamburg World Boxing Championships, 2017 Women Youth Championships Guwahati.
